ABOUT US ASR COIN

ASR Coin is a deflationary coin built on the Binance Smart Chain. We are a sustainable and decentralized project that distributes wealth where its due. ASR Coin will pioneer and elevate the usage of cryptocurrency to be the standard for charitable giving. With a structural and simple to use smart contract coded within the ASR Coin environment, it is possible to create passive income as an investor and a good willing heart person and to fund and assist those organizations that are in need globally.

About ASR Coin

With the limitless reach of technology and cryptocurrency that is revolutionizing the financial industry, ASR Coin wants to touch the lives of many people that are less fortunate. We believe that every human being deserves to have basic necessity in life – food, cloths and shelter. ASR Coin will be the driving force to ensure that via the blockchain technology, ASR Coin will be able to touch the lives of many people out there and bring joy in their hearts and lives.

Congratulation !

The Most Sustainable And Fully Blockchain based Decentralized And Anonymous Platform. Contract Verified And Audited By Independent Business.

Why Choose Us?

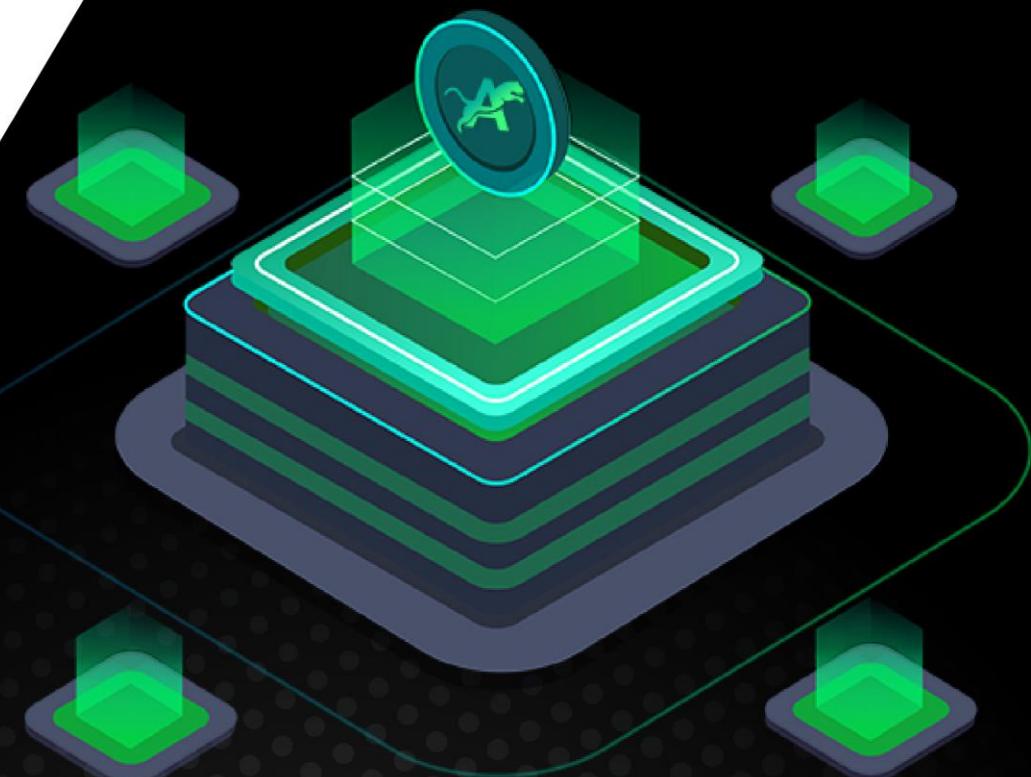

Coin Buy-back & Burn

A coin burn is when you take cryptocurrency, coins, or tokens and destroy them. Many coins or tokens have built-in mechanisms which periodically burn a portion of their existing supply.

The idea is pretty simple. When you burn a coin, you lower the total supply of the coins in circulation. And according to the law of supply and demand, lowering the total supply of coins should theoretically increase its value as long as there is sufficient future demand for the coin.

The sums generated from trading fees are entirely used to buy back ASR Coins from exchanges. Those Coins are burnt in order to reduce the overall ASR Coins circulation, stabilize the Coin price and create deflation.

Ex: The BNB token of the exchange Binance includes a buyback-and-burn program. As outlined in the company's whitepaper, Binance uses 20% of its profits to buyback-and-burn BNB tokens every quarter, reducing the overall circulating BNB token supply.

Why Choose Us?

DAO: Developed By The Community

ASR Coin is owned and operated by its community as a decentralized autonomous organization (DAO). The ASR Coin protocol is subject to a democratic and transparent voting system that enables ASR Coin holders to get involved and shape the future of ASR Coin.

A decentralized autonomous organization is a blockchain-based cooperative that is collectively owned by its members, with rules set and executed through code. DAOs replace centralized management structures with a techno-democratic approach wherein decisions are voted upon by investor-stakeholders.

DAOs are built on top of blockchains and their transactions are visible on the underlying blockchain protocol.

DAO tokens provided the right to vote on allocation of The DAO's collectivized funds to entities, businesses, and technologies seeking investment. After approving funding proposals, stakeholders could be in position to profit from their investments by reaping dividends or benefiting from a token price increased by representation in ownership of successful companies.

Why Choose Us?

Stake & Earn Hold & Earn (RFI)

Generate passive income by providing Liquidity or staking your ASR Coins. ASR holders can stake the Coins into the staking pools to receive rewards. Staking indirectly serves to support the system. ASR Coin is implementing RFI Technology allowing rewards generation simply by Holding ASR Coins.

Stake is defined as an amount of cryptocurrency deposited by the user as collateral. For some cryptocurrencies, the stake is a requirement to become eligible to record and verify the correctness of transactions. Their incentive is earning fees paid by every user, for each transaction.

People who provide a stake are randomly selected to record and verify information on the blockchain. In most proof of stake systems, the larger your stake the greater your chances of being selected to record and verify the blockchain and then to receive the reward.

Why Choose Us?

ASR Coin NFTs

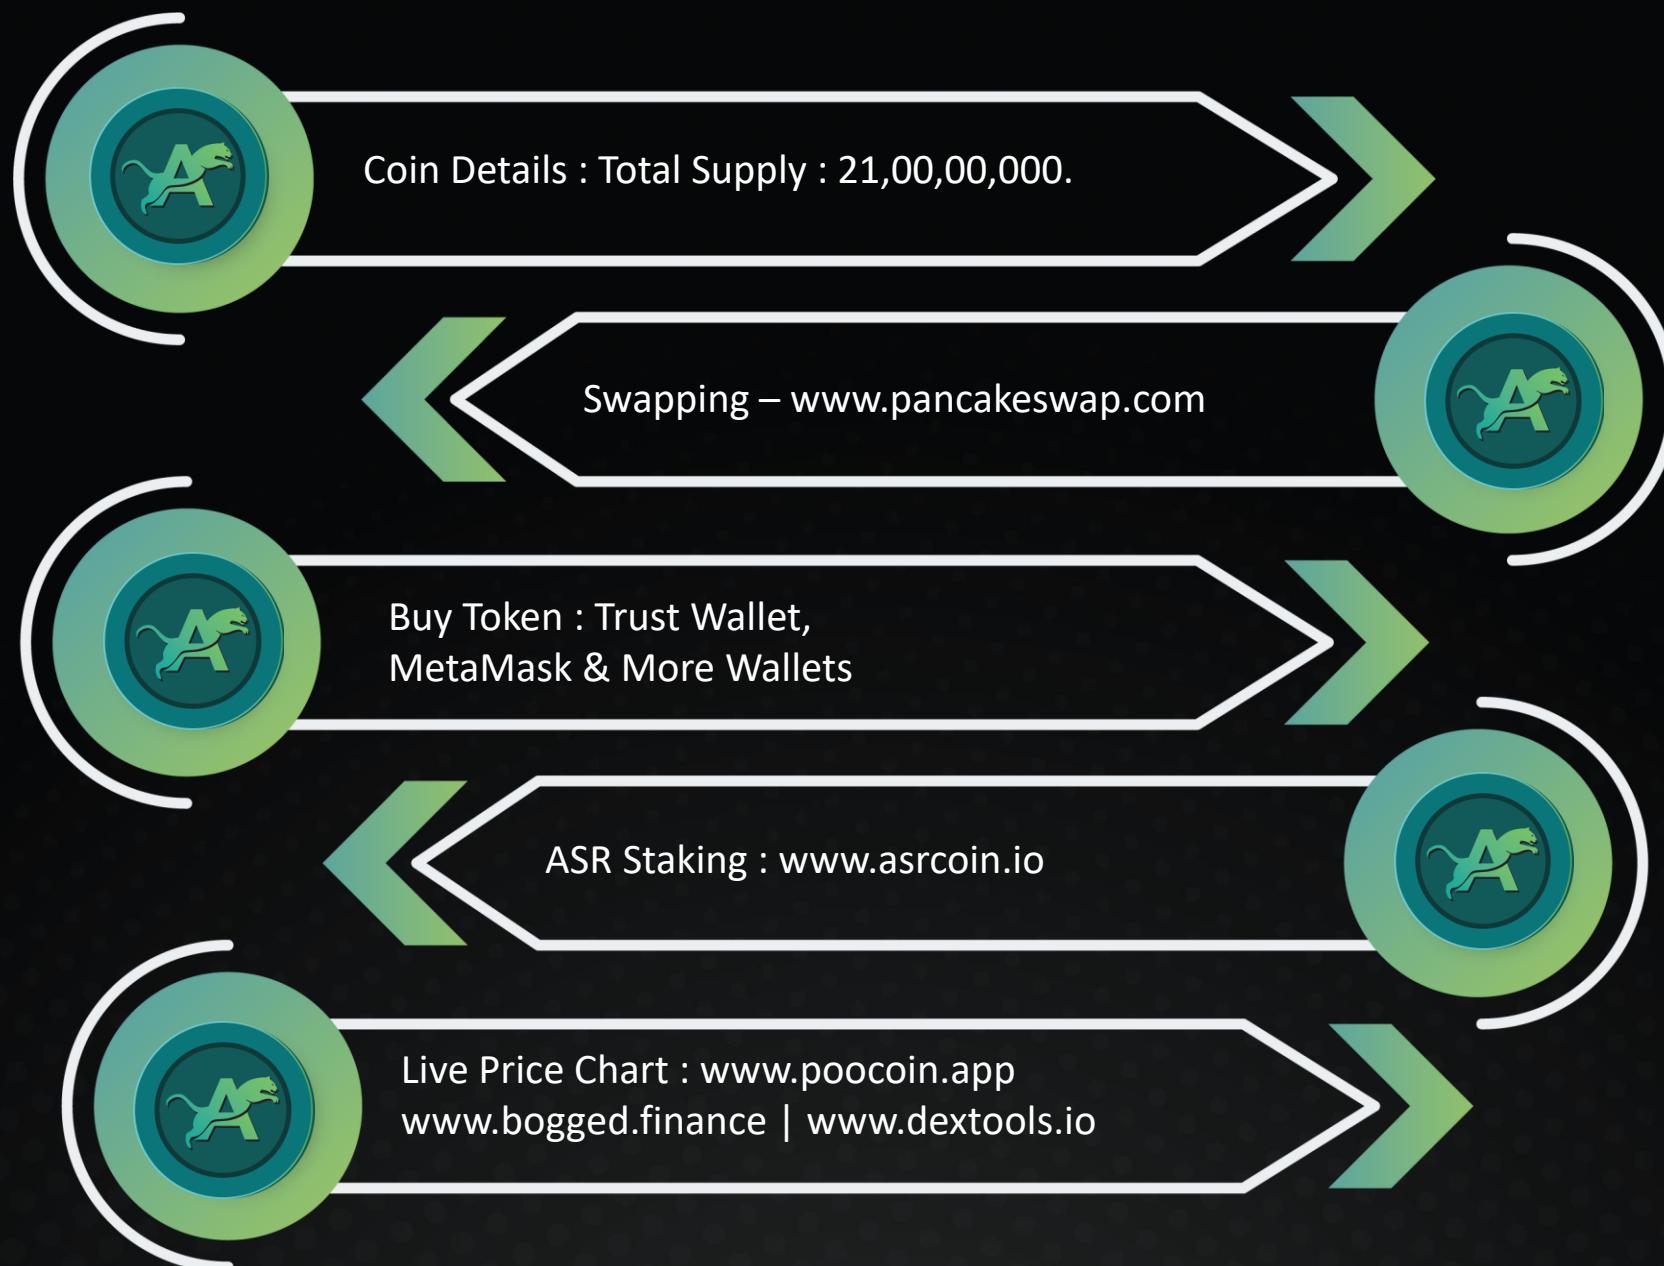

ASR Coin is building a new NFT Protocol and introducing Crypto NFTs as a new feature. Users can mint NFTs with unique characteristics and different rarities (by staking ASR Coins) then stake it in the NFT Pools to generate rewards.

Issue, trade NFTs and participate in auctions!

An NFT is, in essence, a collectible digital asset, which holds value as a form of cryptocurrency and as a form of art or culture. Much like art is seen as a value-holding investment, now so are NFTs. NFT stands for non-fungible token – a digital token that's a type of cryptocurrency, much like Bitcoin or Ethereum. But unlike a standard coin in the Bitcoin blockchain, an NFT is unique and can't be exchanged like-for-like (hence, non-fungible). Because an NFT allows the buyer to own the original item. Not only that, it contains built-in authentication, which serves as proof of ownership. Collectors value those "digital bragging rights" almost more than the item itself.

ASR Airdrop

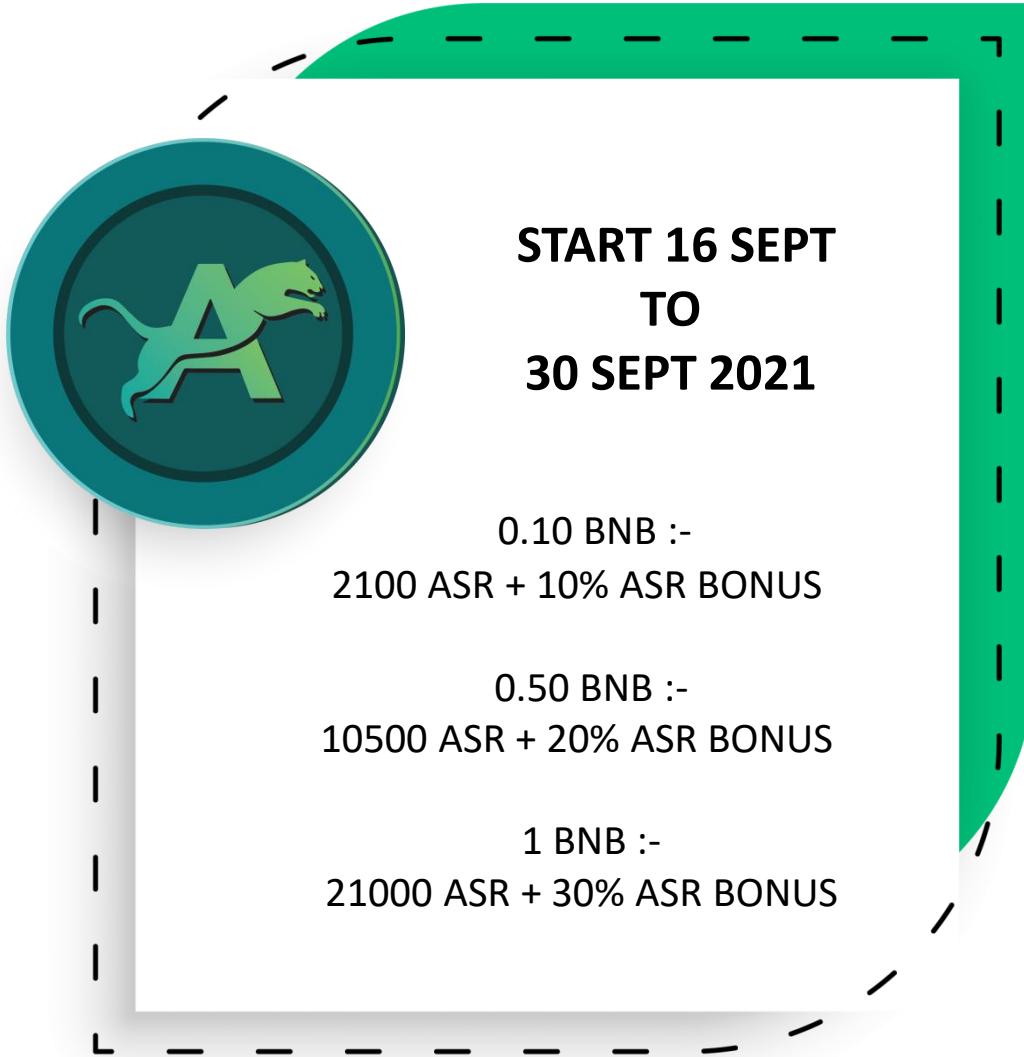

An airdrop, in the cryptocurrency business, is a marketing stunt that involves sending coins or tokens to wallet addresses in order to promote awareness of a new virtual currency. Small amounts of the new virtual currency are sent to the wallets of active members of the blockchain community for free or in return for a small service, such as re-tweeting a post sent by the company issuing the currency.

How To Claim Airdrop?

- Download MetaMask (a crypto wallet in form of a browser extension or an app).
- After that you have to add the Binance Smart Chain to your network-list.
- On asrcoin.io's website click on the Connect button, top right side of the page.
- A popup will come up to Connect your MetaMask ,click on Connect.
- Then go to asrcoin.io's website, go to Airdrop page and click on “Claim ASR” to claim your ASR Coin.
- You have to have sufficient balance in your wallet to pay Gas fees.
- Each address is initially rewarded 250 ASR.
- Airdrop ASR will be distributed at a time.
- The total amount is limited, and available on the “first come, first served” basis.”
